I strongly urge my representatives to vote for more choice and more competition. XM radio is a valuable service and a valid source of up-to-the minute information I use on a daily basis to keep me informed. I am not exaggerating to say that I will use my voice and my vote on this issue - and I AM a member of the NAB. The lobby does not speak for all the members. Competition is good, and the effort to limit services that satellite services can provide is one that is being forwarded by a small minority who are protecting their own interests to the detriment of the overall public.
